## SITE AND DESIGN REVIEW – DCO TYPE III: STANDARDS AND CRITERIA

1. The Board shall, in exercising or performing its powers, duties or functions, determine whether there is compliance with the <u>intent</u> of the following DCO site and design review standards:

#### 16.41.070.A.1.

Design standards in this section are intended to help create an active, inviting street and sidewalk-facing storefronts and entryways that are friendly and easily accessible to passersby. They also will help ensure that the ground floor promotes a sense of interaction between activities in the building and activities in the public realm; and

#### 16.41.070.B.1.

Build upon downtown Canby's traditional architectural vernacular by incorporating cohesive and repetitive architectural elements into the ground floor of street facing facades; and

## 16.41.070.C.1.

Build upon Canby's traditional downtown architecture by creating an attractive and unified building façade that celebrates ground floor activities, the top of the building (where the edifice meets the sky), and everything in between; and

#### 16.41.070.D.1.

Create a strong architectural statement at street corners to create a strong identity. Establish visual landmarks and enhance visual variety; and

### 16.41.070.E.1.

Use building materials that evoke a sense of permanence and are compatible with Canby's business areas and the surrounding built environment; and

# 16.41.070.F.1.

Use colors and buildings that are generally compatible with Canby's business areas and the surrounding built environment.

- 2. The Board shall, in making its determination of compliance with the above requirements, be guided by the objectives and standards set forth in this section. If the site and design review plan includes utility facilities or public utility facility, then the City Planner shall determine whether those aspects of the proposed plan comply with applicable standards.
- 3. The Board shall, in making its determination of compliance with the requirements set forth, consider the effect of its action on the availability and cost of needed housing. The Board shall not use the requirements of this section to exclude needed housing types. However, consideration of these factors shall not prevent the Board from imposing conditions of approval necessary to meet the requirements of this section. The costs of such conditions shall not unduly increase the cost of housing beyond the minimum necessary to achieve the purposes of this ordinance.
- 4. As part of the site and design review, the property owner may apply for approval to cut trees in addition to those allowed in Section 12.20.080 of the City Tree Ordinance. The granting or denial of said application will be based on the criteria in Chapter 12.20 of the City Tree Ordinance. The cutting of trees does not in and of itself constitute change in the appearance of the property which would necessitate application for site and design review.
